

GLORIA®

Equipment for home and garden

A passion
for gardens

A passion for gardens

GLORIA offers you the perfect tools and solutions to turn your garden into a haven of peace and tranquillity.

For amateur or professional gardeners, for small or large gardens – with Gloria quality products you have everything under control at all times.

Convince yourself – good quality and friendly service go without saying for us.

Outstanding quality

The name GLORIA has been a byword for quality and reliability for decades. This continuous success is based on tradition and experience.

The foundation for the durability and robustness of the equipment from GLORIA is already cast at the product development stage. Not only are the conditions of use in the garden taken into account, but also the user's ergonomics and comfort of use requirements.

Only high quality materials are used in the production, no matter whether plastic or stainless steel models are being manufactured. The most modern technical equipment ensures optimal production conditions.

Experienced production staff guarantees the required assembly care. Repeated inspections of the components during the manufacturing process also exclude any errors at an early stage.

The result of all these efforts:

- The convincing robustness of the GLORIA equipment.
- The ergonomic design makes work simple and easy.
- Durable components, finely worked components and a wide range of accessories impart the unique pleasure the user has when working with a GLORIA product.

GLORIA works in accordance with the DIN ISO 9001 quality standard. This results in a constant quality of the products and services, permanent reliability and constant quality.

In addition to the CE certificate, many of our models have been granted a TÜV/GS technical inspection agency seal as proof of their excellent safety level.

GLORIA offers a 10-year service and spare parts warranty for all of the products in the following range, enabling the customers to benefit from the quality of their piece of Profiline equipment for a long time to come.

This are the arguments which justify the trust placed in the GLORIA sprayers!

GLORIA Quality – more than just a word!

High performance sprayers with professional equipment

Our high-performance sprayers made of robust steel or non-corroding stainless steel offer you safe handling and maximum convenience with an extensive level of equipment. The steel sprayers have a high-quality plastic inner coating which protects the interior of the container against corrosion and makes cleaning easier. The stainless steel appliances particularly stand out on account of their robustness and corrosion resistance. Both types are particularly suitable for spreading biological plant protecting agents.

All models operate at 6 bar working pressure and have a filling volume of 5 or 10 litres. This makes them ideally suited for use in medium-sized and larger gardens. Combined with suitable extension lances, a spraying height of 6 m can be achieved.

The high performance sprayers are equipped with various features which are important for a comfortable and safe handling. 5 litres or 10 litres sprayers, steel or stainless steel – all sprayers offer helpful solutions to individual needs and convince their users by their quality and reliability.

High performance sprayers with professional equipment

Indicator pressure gauge

Pigeon hole for small parts like gaskets or nozzles

Pump holder

Additional filter: absorbs dirt particles and avoids the plugging of the nozzle

With information cards and information card holder

Spray lance park facility

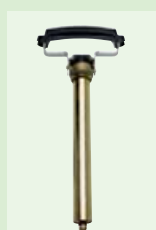

Safety relief and ventilating valve

Large filling funnel

Spray lance receiver: avoids the contamination of the nozzle while out of operation

Brass high performance pump

Brass quick-action vent

Carrying strap or shoulder straps (depending on the model)

**Made in
Germany**

High performance sprayers made of steel with professional equipment

High performance sprayer 405 T

Pressure tank made of steel with high-quality plastic interior coating

- Max. operating pressure **6 bar** • filling capacity 5 litres • TÜV and GS tested
- brass quick-acting valve • indicator pressure gauge • safety relief and ventilating valve
- padded carrying strap • portable on shoulder • additional filter • residue drainage.

Ref. No. 000405.0000

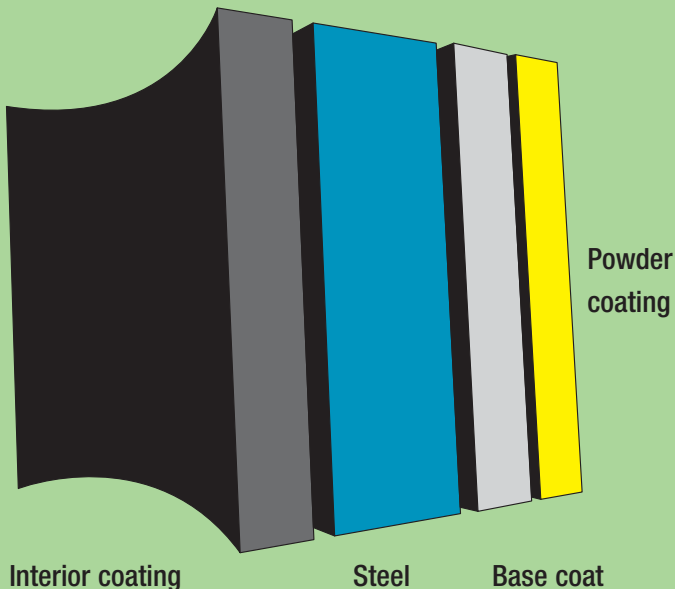

High performance sprayer 410 T

Pressure tank made of steel with high-quality plastic interior coating. Complies with the requirements of the plant protection act.

- Max. operating pressure **6 bar** • filling capacity 10 litres • TÜV and GS tested
- brass quick-acting valve • indicator pressure gauge • safety relief and ventilating valve
- spray lance with BBA-recognized hollow cone nozzle • backrest • carrying straps with quick-tightening system and padding
- portable on back • additional filter • residue drainage.

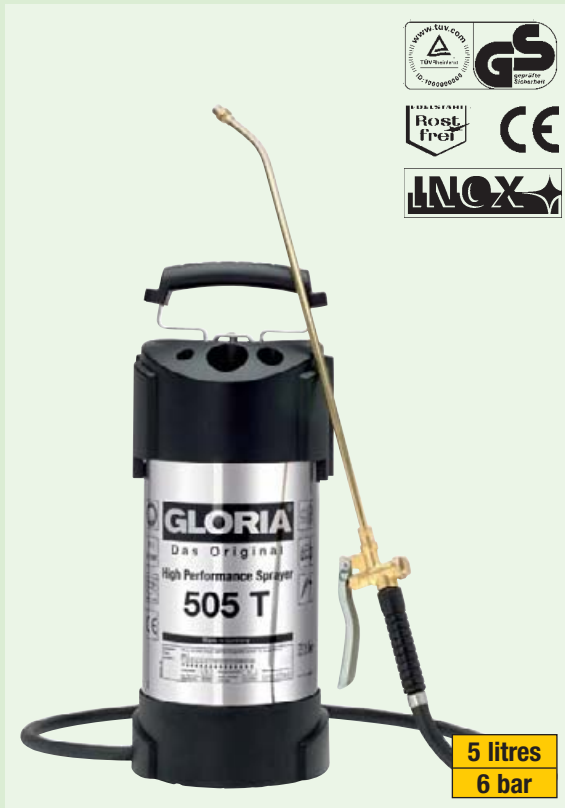

Ref. No. 000410.0900

Practical and comfortable

Pressure sprayer hobby exclusiv, type 262

Convenient sprayer for garden care.

Max. operating pressure 3 bar • filling capacity 5 litres • TÜV and GS tested

• large filling funnel • indicator pressure gauge • pressure relief valve
• powerful pressure pump • telescopic spray lance with adjustable swivelling nozzle (length: max. 1000 mm) • hose connection at bottom of tank (to drain residues)

• **with additional filter** (traps dirt particles and prevents blockages in the nozzle)

• **spray shield** ideal for precise spraying of edges

• spray lance park facility • stable carrying strap with shoulder pads.

Ref. No. 000262.0000

Pressure sprayer hobby universal, type 261

Max. operating pressure 3 bar • filling capacity 5 litres

• TÜV and GS tested • large filling funnel • indicator pressure gauge • pressure relief valve • powerful pressure pump • brass tube with swivelling and adjustable nozzle
• spray lance park facility • stable carrying strap.

Ref. No. 000261.0000

Accessory spray shield

Ideal for accurate spraying of edges. Suitable for pressure sprayer prima 5 (type 39 TE / 42 E), hobby (type 229 TS), hobby universal. Simple fitting by pushing onto the nozzle of the spray lance on the sprayer.

• with hanging bracket
• diameter: 110 mm.

Ref. No. 000280.0000

Accessory cleaning agent for sprayers

Residues of the spraying agent are neutralised by the GLORIA special activated carbon and removed with the solution. Content 200 g.

Ref. No. 000263.0000

Practical and versatile

Pressurised sprayers with max. 3 bar are suitable for small trees, bushes and roses. Extension spray lances up to 1 metre in length are recommended for use with this model.

The prima 5 model 39 TE sprayer from GLORIA is especially handy, practical and economical. It is the best-selling sprayer from our huge range of million fold tested plant care products.

5 litres
3 bar

Pressure sprayer prima 5, type 39 TE

An value-for-money appliance which is good for small gardens. Max. operating pressure 3 bar

- filling capacity 5 litres
- TÜV and GS tested
- piston pressure gauge with integrated safety valve
- filling funnel
- powerful pressure pump
- carrying strap.

Ref. No. 000080.0000

Accessory spray shield suitable for prima 5 type 39 TE, 42 E and prima 8

- allows edge-perfect spraying on paths and planted areas
- with built-in flat jet nozzle.

Ref. No. 000270.0000

5 litres
3 bar

Pressure sprayer prima 5, type 42 E

as prima 5, Typ 39 TE, but not TÜV and GS tested.

Ref. No. 000081.0000

Piston knapsack sprayers – for hobby and professional gardeners

GLORIA piston knapsack sprayers stand out on account of their large working range, making them particularly suitable for use in larger and large gardens. The areas of application are very variable e. g. in viticulture, forestry or greenhouses.

Easy to see contents level indicator

Convenient spray lance park facility

Filling sieve

Piston knapsack sprayer type 2012

Filling capacity 12 litres • stable plastic container • quick-acting valve with integrated pressure gauge • brass spray lance with BBA recognized hollow cone nozzle • plastic pump • pump lever for right and left side use • with spray lance park facility • quick tightening system of the padded carrying straps • filling sieve • integrated backrest • easy to see contents level indicator • suitable for the spraying of plant care products.

Ref. No. 000044.0000

Piston knapsack sprayer type 2018

Filling capacity 18 litres • stable plastic container • incl. extension lance 0.5 m • quick-acting valve with integrated pressure gauge • brass spray lance with BBA recognized hollow cone nozzle • powerful plastic pump, pump lever for right and left side use • with spray lance park facility • quick tightening system of the padded carrying straps • filling sieve • integrated backrest • easy to see contents level indicator • suitable for the spraying of plant care products

Ref. No. 000054.0000

Piston knapsack sprayer type 2016

Filling capacity 16 litres • container made from stainless steel • incl. extension lance 0.5 m • quick-acting valve with integrated pressure gauge • brass spray lance with BBA recognized hollow cone nozzle • powerful plastic pump, stable swivelling pump lever • quick tightening system of the padded carrying straps • filling sieve • integrated backrest • suitable for the spraying of plant care products

Ref. No. 000064.0000

Plant care made easy

Fine sprayers and pressure sprayers

have their own use in gardens, greenhouses and households, for indoor plant care, balconies and cleaning work.

The filling capacity of fine sprayers and pressure sprayers is 0.3 - 1.0 litres.

0.5 litres

Fine sprayer type 137

Practical and versatile suitable in households and gardens.

Filling capacity 0.5 litres

- **double-action precision pump** • adjustable nozzle • very fine spraying • good stability
- stable plastic container.

Ref. No. 000137.0000

1 litres

Fine sprayer type 138

Practical and versatile suitable in households and gardens.

Filling capacity 1.0 litres

- **double-action precision pump** • adjustable nozzle • very fine spraying • good stability
- stable plastic container.

Ref. No. 000138.0000

0.3 litres

Fine atomizer type 208

Its mist-like spray makes this model ideally suited for special use in greenhouses as well as for the care of indoor plants, orchids and roses.

- Filling volume 0.3 litres • container and piston tube made of plastic
- unscrewable spraying agent container.

Ref. No. 000208.0000

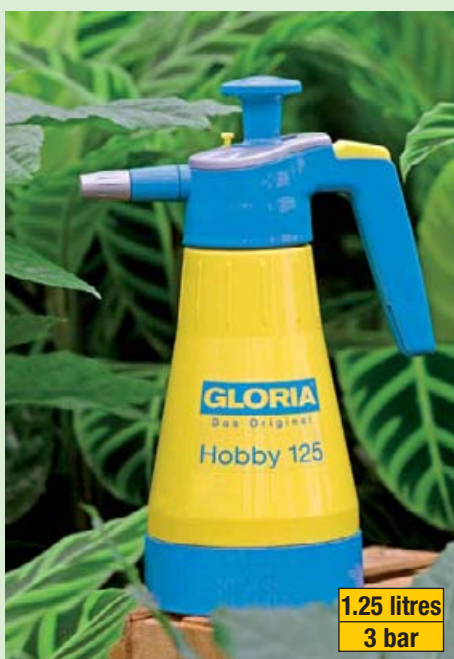

Pressure sprayers for garden care

Pressure sprayer primex 5

A value-for-money sprayer for the garden. Max. operating pressure 3 bar • plastic container • filling capacity 5 litres • TÜV and GS tested • piston pressure gauge with integrated safety valve • powerful pressure pump • spray lance park facility • additional base support for good stability • brass extension lance 50 cm • brass spray lance with adjustable nozzle • carrying strap.

Ref. No. 000083.0000

Pressurised sprayer hobby 125

Filling capacity 1.25 l • max. operating pressure 3 bar • good stability through additional base support • adjustable nozzle • safety valve • high performance pump • ergonomically formed handle

Ref. No. 000025.0000

Pressurised sprayer type 133

A fine sprayer for household and garden. Max. operating pressure 3 bar • filling capacity 1 litre • adjustable nozzle • stable plastic container.

Ref. No. 000133.0000

Pressurised sprayer floretta, type 259

A comfortable fine sprayer for household, balcony and garden. Max. operating pressure 3 bar • filling capacity 1 litre • swivelling and adjustable nozzle for under-leaf care • safety valve • precision pump.

Ref. No. 000259.0000

SPRAY & PAINT

Spray instead of brushing

Pressure spray device for environmentally-friendly sprayable wood preservation oils and glazes

► **Ideal results:**

even and flat surface areas without drips, no formation of sags

► **Ergonomic:**

comfortable and clean work with convenient spray lance

► **Time-saving:**

quick processing thanks to the effective flat jet nozzle

► **Cost-saving:**

economic use, efficient operation

Original GLORIA accessories

and your sprayer becomes even more versatile

Accessory cleaning agent for sprayers

Residues of the spraying agent are neutralised by the GLORIA special activated carbon and removed with the solution.

Content 200 g.

Ref. No. 000263.0000

Compressor connection

suitable for certain GLORIA high performance sprayers. With safety valve, compressed air connection and non-return valve.

Ref. No. 000135.0000

Plastic telescopic extension lance

compl. with nozzle, extendable from 0.58 to 1.0 m, for type 229 S/T/TS, prima 5, 256, 257, 261, 262.

Ref. No. 000122.0000

Brass extension lances for high performance and pressure sprayers

Type 124, length: 0.5 m

Ref. No. 000124.0000

Type 109, length: 0.7 m

Ref. No. 000109.0000

Type 110, length: 1.0 m

Ref. No. 000110.0000

Telescopic extension lances (brass)

Type 131 smoothly extends from 0.5 to 1.0 m

Ref. No. 000131.0000

Type 132 smoothly extends from 1.0 to 2.0 m

Ref. No. 000132.0000

Type 132 only applicable with brass quick-acting valve.

Brass wide spray lance

Particularly suitable for area spraying and for the processing of row planting. Width 1.0 m with 3 flat jet nozzles.

Ref. No. 000107.5000

Aluminium arched sprayer

For type 176 T, 172 RTG, 141 T, 142 TG, 2010 G, 2001 SG, 165 SG
Larger plants and growths in row cultivations are primarily sprayed with the arched sprayer.

Complete with 2 nozzles. Nozzle type G-H 49-55.

Ref. No. 000117.0000

Extension lances

Extension lances are very useful if you want to reach high levels, e. g. firs, fruit or broad-leaved trees. High performance sprayers reach a working pressure of 6 bar which is necessary for high trees. If you use the right extension lances you can treat trees up to 4 m high without any problems.

Extension lances of up to 1 m are recommended for pressure sprayers (3 bar).

Brass special flat jet nozzle

Suitable for all high performance sprayers. Application: Especially suited for row cultivation and cultivated areas thanks to the constant spraying width setting. Spraying angle: 90°.

Ref. No. 000111.0000

Special lime nozzle For use with lime only, fits all high performance sprayers and model 162. Application: Ideally suited for spraying viscous spraying solutions, e.g. lime in stalls and cellars. Spray exits at the front. Spraying angle: 65°.

Ref. No. 000112.0000

Nozzle compl. adjustable

For type prima 5. Spraying angle: 0 – 60°.

Ref. No. 726984.0000

Nozzle Ø 1 mm with spray nozzle insert

For all GLORIA high performance sprayers, nozzle type G-H 49-55. Spraying angle: 55°.

Ref. No. 725830.0000

Nozzle Ø 2 mm with spray nozzle insert

For all GLORIA high performance sprayers, nozzle type G-H 116-80. Spraying angle: 80°.

Ref. No. 725820.0000

Nozzle compl. adjustable For type 251, 256, 257, 259, 229 TS.

Spraying angle: 0 – 60°.

Ref. No. 726029.0000

Nozzle

Suitable for prima 5, 251, 256, 257, 259, 229 TS.

Ref. No. 706840.0000

Hollow cone nozzles, 2 x Ø 1 mm, 1 x Ø 2 mm, with atomiser

Fits all GLORIA high performance and piston knapsack sprayers. The Ø 2 mm nozzle creates a large drop size when spraying the media. This nozzle is used for spraying individual rows (small cultivated areas).

Ref. No. 706810.0000

Pressure controller

For GLORIA high performance sprayers. Offers the possibility to adjust the required operating pressure.

Ref. No. 000022.0000

Spray shield

Ideal for accurate spraying of edges with built-in flat jet nozzle for high performance and piston knapsack sprayers (nozzle BBA certified).

Ref. No. 000260.0000

Spray shield

Suitable for pressure sprayer prima 5 type 39 TE, 42 E and prima 8. Ideal for accurate spraying of edges • with built-in flat jet nozzle.

Ref. No. 000270.0000

Spray shield

Ideal for accurate spraying of edges. Suitable for pressure sprayers prima 5 (type 39 TE / 42 E), hobby (type 229 TS), hobby universal (type 261). Simple fitting by pushing onto the nozzle of the spray lance on the sprayer • spray shield with hanging bracket for SB hook • diameter: 110 mm.

Thermal weed removal

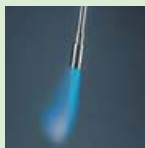

The useful plants are being deprived of water, nutrients and warmth by the weeds. Every garden owner knows this problem. The environmentally conscious gardener renounces the use of herbicides to kill off weeds. Thermal weed killing is the correct alternative with regard to the environment and your health. The difficult and hard work involved in removing weeds is now a thing of the past!

Piezo ignition

Rotary gas supply valve

Ø Burner cone:
approx. 27 mm

Before

After

Thermoflamm

The GLORIA Thermoflamm makes it easy and practical to remove »bothersome weeds«. The unit is flexible to use especially in places that are difficult to access. The Thermoflamm is fitted with an ignition mechanism (piezo ignition), which makes it easy to use. You no longer need to carry a lighter or matches. It should be held approx. 3 cm away from the weeds and then moved slowly across the weeds that you want to remove. Thermoflamm will remove weeds growing in the edges of paths, gravel paths, terraces, driveways, house entrances, garden steps, borders of stone, from flower and vegetable beds and it will also remove moss from stonework and walls.

• Length: approx. 780 mm • Ø burner cone: approx. 27 mm • flame temperature: approx. 1000° C • weight incl. gas cartridge (284 g): approx. 1 kg

Ref. No. 000187.0000

Gripping without bending down with absolute precision

The GLORIA universal gripper is a useful aid for many people in their daily lives. The gripper can be used to pick up a variety of objects from the ground, from cupboards, cabinets, tables, working surfaces, etc. without any effort. The universal gripper can also be put to good use in the garden. Rubbish can easily be removed from lawns, front gardens, beds and garden ponds or from pavements.

Universal gripper SE

For simple gathering without bending down.

Particularly suitable for gathering litter.

Length: approx. 99 cm • jaw width: 13,5 cm

• weight: approx. 400 g • ergonomic pistol

grip • suitable for left and right handed

people • aluminium shaft • jaws (made of

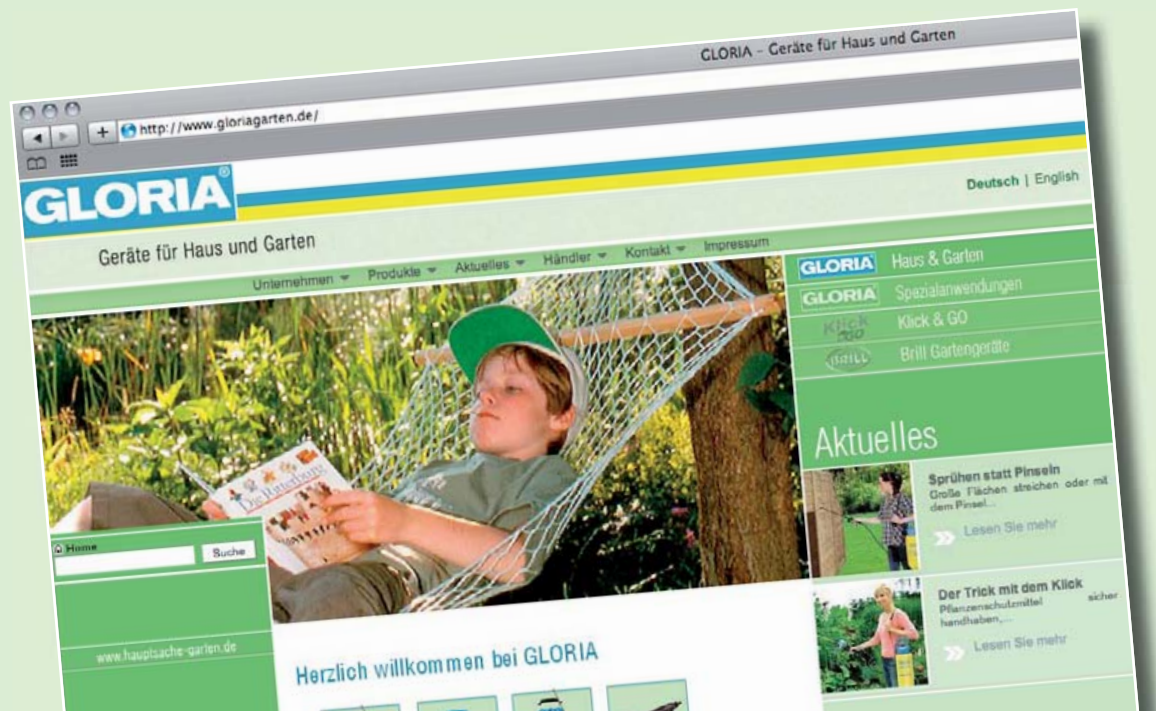

thermoplastic material) exchangeable

• also grips small objects • easy to use.
